

Harsh Singh

Austin, Texas | (469) 412-4014 | h@harshsingh.me | [linkedin.com/in/haaarshsingh](https://www.linkedin.com/in/haaarshsingh)

EDUCATION

Purdue University

May 2024

B.S. Computer Engineering (Cumulative GPA: 3.90/4.00)

North Forney High School

High School Diploma (Cumulative GPA: 4.00/4.00, SAT: 1540)

EXPERIENCE

Technical Lead

Jan 2025 – Present

MainBranch

Washington, D.C.

- First technical hire; led the engineering team building AI agents for local government agencies
- Recruited, interviewed, hired, and led a 10-engineer product team across frontend, backend, and infra
- Architected and shipped a scalable document ingestion and processing pipeline handling heterogeneous data sources
- Took the product from 0→1; now used by the City of Detroit

Product Engineer

Sep 2023 – Jan 2025

Independent

San Francisco, CA

- Built and shipped 0→1 products for early-stage companies (Series A and earlier)
- Created early versions of AI-enabled features, data ingestion pipelines, and automation workflows
- Guided implementation of emerging technologies such as PlanetScale, Next.js 13, Cloudflare Workers, tRPC, and Drizzle
- Notable clients include Same.dev, Sole Retriever, Quickpark Solutions, Roofer, Monument, Glimpse, Makebot, Kandy, and many more startups (stealth and launched)

Software Engineer

Apr 2023 – Sep 2023

Dimension

- Shipped a scalable inbox system, addressing concurrency, state consistency, updates, and performance
- Developed third-party integrations and ingestion pipelines with tools like Linear, Vercel, Slack, and more
- Built an event-driven automation system that analyzed inbound messages and automatically created issues, comments, etc.

Dorm Pool

May 2021 – Apr 2022

Founder

Austin, TX

- Ride sharing platform for UT students, facilitating 300+ rides across the state of Texas
- Owned product, engineering, and operations; directly interacted with students to resolve issues and refine the product
- Implemented the ride lifecycle and matching logic for a live ride sharing platform
- Drove early user acquisition by marketing DormPool directly to UT Austin student clubs and organizations

PROJECTS & OPEN SOURCE

kmenu.dev

2022

- High performance, composable, accessible, responsive, and framework-agnostic command menu system
- 1,400+ weekly downloads; Product Hunt #10; used by 25+ companies in production
- Built and maintained a widely adopted project (800+ GitHub stars), managing releases and preserving API stability
- Drove early adoption by marketing in person and demoing at meetups and conferences

Groovy

2022

- Built a pre-foundation-model CV recommendation system using facial analysis to infer preferences and suggest movies/TV
- 1st place at UMD Bytecamp 2022 (AI, innovation, and best use of data categories)
- Implemented the full pipeline from face detection and feature extraction to preference modeling and content ranking

snip.tf

2020

- No ads, tracking, or client-side bloat; includes a CLI, Discord bot, public API endpoints, link shortener, and JS client
- 120,000+ pastes created; 2,500+ monthly active users; used in the Programmer's Hangout Discord community
- Shipped a high-throughput Rust/Actix Web service with async handlers, rate limiting, concurrency, and low-latency access

dots

2020

- Arch Linux and i3wm configuration with a keyboard-driven workflow and sane defaults
- Includes configurations for Neovim, Starship, Alacritty, Rofi, Ranger, Compton, GTK, Dunst, Polybar, and more

SKILLS, APPEARANCES & CLUBS

Skills: AWS ECS, Fargate, TypeScript, React, Tailwind CSS, Node.js, PostgreSQL, Docker, CI/CD, Figma, Elasticsearch

Appearances: React Jacksonville, React DFW, Remix India, Prisma Meetup 7, Data on Kubernetes, CockroachDB Serverless

Clubs & Societies: Engineering Projects in Community Service, Purdue Investing Club, Hack Club @ North Forney
